

2011

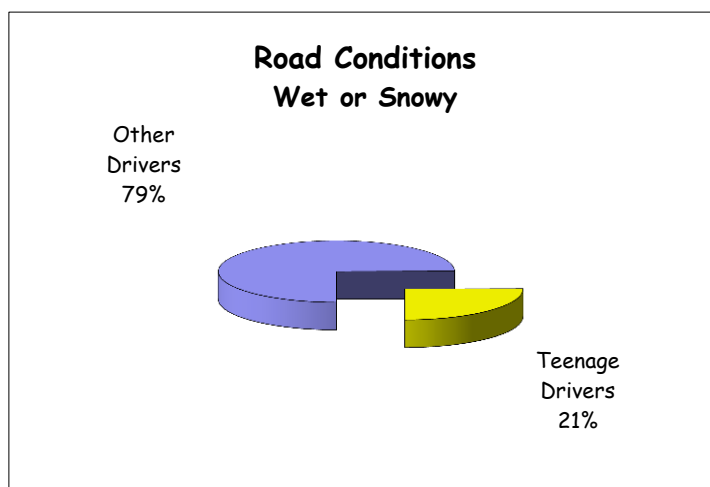

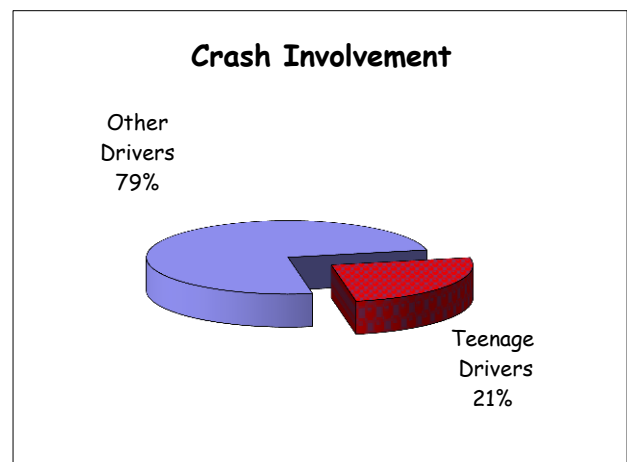

Nebraska Teenage Drivers (Ages 15-19) Compared to All Other Licensed Drivers

Teens account for 7.3% of all licensed drivers in the State of Nebraska.

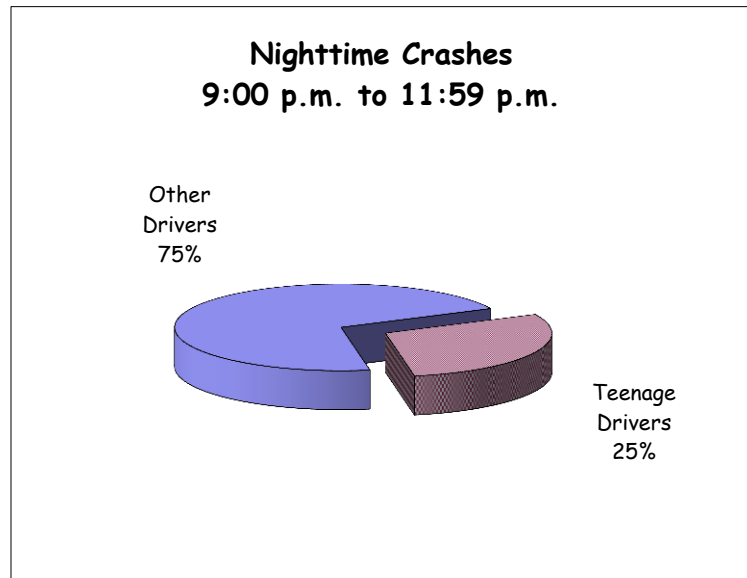

However, teenage drivers are overrepresented in motor vehicle crashes.

In 2011, teenage drivers were involved in 21% of all crashes, while only representing 7.3% of the driving population.

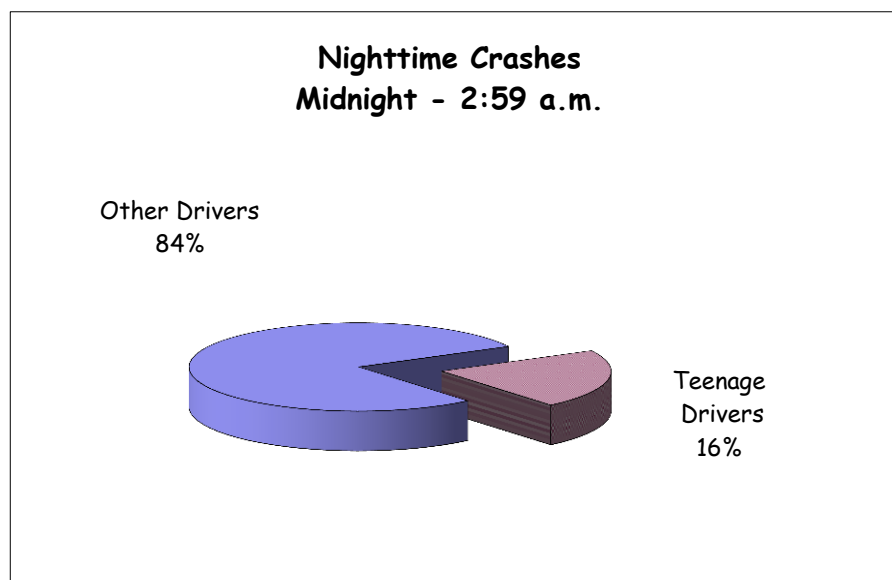

When wet or snowy conditions were present, teenage drivers were involved in 21% of all crashes.

Time of Day

Teenage drivers were involved in 25% of nighttime crashes occurring between 9:00 p.m. and 11:59 p.m.

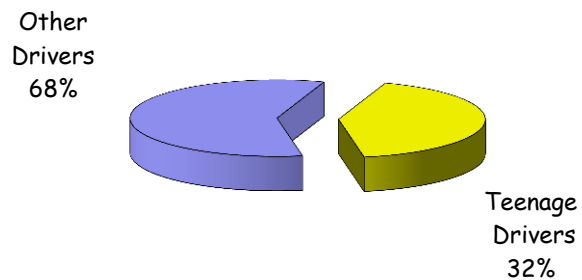

Teenage drivers were involved in 1 of every five nighttime crashes occurring between midnight and 2:59 a.m.

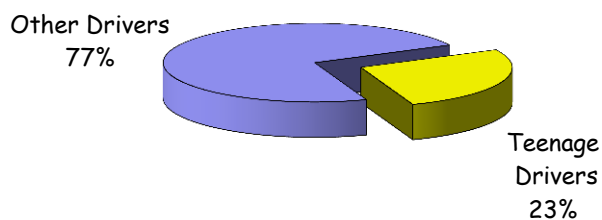

Speed

In crashes where "Exceeding the Speed Limit" was determined to be the major cause of the crash, 32% were teenage drivers.

Exceeding the Speed Limit

Speeding too Fast for Conditions

In crashes, where "Speeding too Fast for Conditions" was cited as the major cause of the crash, 23% were teenage drivers.
